

## **ECOANALYSTS, INC. TAKES HOME TWO 2011 EBJ BUSINESS ACHIEVEMENT AWARDS**

**MOSCOW, Idaho (February 2012)** — EcoAnalysts, Inc. is pleased to announce that it was chosen to receive two Environmental Business Journal awards, one for “Small Business Achievement” and another for “New Practice Area”.

The Small Business Achievement Award was earned for significant improvements in revenue and company performance measures. From 2009-2011 the company has more than doubled its revenues while significantly improving its bottom line.

The New Practice Area award was earned after EcoAnalysts significantly grew its marine ecology program through client diversification, winning a significant project in the Gulf of Mexico and the strategic hiring of marine taxonomists and a Director of Marine Sciences this past year.

“EcoAnalysts has typically been a slow and steady growth company over the last 17 years. More recently we seem to have really hit our stride on several fronts, including better operational controls, winning key federal contracts, and attracting senior level talent who are helping us grow,” Gary Lester, EcoAnalysts CEO said.

This is EcoAnalysts' third year winning an EBJ award, after winning its first award back in 2009 for Organizational Innovation.

Each year EBJ recognizes outstanding business performance in the environmental industry with the business achievement awards. Winners are recognized for their contributions to the industry and society at large. The 2011 EBJ awards will be presented at the Environmental Industry Summit IX in Coronado, California on March 14-16, 2012.
