

Marine Mollusca Taxonomist
EcoAnalysts, Inc., Moscow, Idaho
www.ecoanalysts.com

EcoAnalysts is a growing company specializing in services supporting the bioassessment of freshwater, estuarine, and marine surface waters. In our 15 years of operation we have become a national leader in the industry, processing 4,000-5,000 benthic samples annually. We are committed to providing superior customer service by working hard to bring excellence, integrity, stewardship and teamwork to everything we do. To accomplish this consistently, we need superb people – the best of the best.

EcoAnalysts is currently expanding its marine services and we have a need for a marine mollusca taxonomist. We are searching for an individual who has experience with and enjoys marine taxonomy and who wants to be part of a successful team of aquatic scientists. If you wish to use your knowledge and experience to help people make informed decisions regarding the condition and stewardship of our natural resources, then we encourage you to explore the information below and throughout our entire web site at www.ecoanalysts.com.

Major Position Duties

The primary duties of this position are the identification of marine mollusks, particularly bivalves and gastropods. We work in a production environment where accuracy is critical and speed is imperative. No research will be involved in this position and applicants should expect responsibilities that are common to production bench taxonomy.

Location

Moscow, ID.

Qualifications

The majority of our projects come from the coasts of North America. The successful candidate will have expertise in taxonomy of marine mollusks, particularly bivalves and gastropods. A minimum of two solid years experience in North American taxonomy of the group is required.

The successful applicant must have a good work ethic, be able to meet deadlines, be willing to go the extra mile, and work well in small groups as well as independently.

Minimum educational qualifications are a bachelor's degree in the biological sciences, including coursework in invertebrate zoology, marine biology or oceanography. We also require at least three years of full-time experience working in marine taxonomy. Preference will be given to applicants with at least one years of identification experience in a production taxonomy setting.

Compensation

Salary and benefits are dependent upon experience and qualifications. Benefits include: a flexible work schedule, vacation/sick time, health insurance (medical, vision, and dental) and an employer-matched investment fund.

Application

Please send or email 1) letter of application, 2) complete resume, and 3) three professional references. No phone calls please.

Anticipated start date

Negotiable.
