

## **PRESS RELEASE**

### **ECOANALYSTS, INC. HIRES NEW DIRECTOR OF MARINE SCIENCES**

MOSCOW, ID -- EcoAnalysts, Inc. is proud to announce Pam Neubert, Ph.D. as its new Director of Marine Sciences.

Neubert comes to EcoAnalysts with more than 15 years experience in marine ecology and business development. She has spent the last 14 years as a technical director at AECOM in Massachusetts, providing marine ecology consulting services to the oil and gas industry, ports, harbors, marinas, and municipal outfalls in marine environments.

As part of EcoAnalysts' business development and technical teams, Neubert will assist in expanding EcoAnalysts' marine and coastal ecology services. She will also manage EcoAnalysts' newest office in Woods Hole, Mass., which is home to Woods Hole Oceanographic Institute, a recognized center of excellence for oceanographic sciences.

"I am excited to welcome Pam to the EcoAnalysts' team. We have worked with her at AECOM for nearly two years and during this time we developed a terrific working relationship. She brings a great deal of expertise, enthusiasm, and connections to our group and her international project experience will help bring us one step closer to making EcoAnalysts the global leader in freshwater and marine bioassessment services," Gary Lester, EcoAnalysts CEO, said.

Neubert holds a Ph.D in Marine Biology from Northeastern University and has completed her post-doctorate fellowship at Woods Hole Oceanographic Institute.

To find out more about our new office in Woods Hole, MA or about our marine services contact, Candace Lowe at [clowe@ecoanalysts.com](mailto:clowe@ecoanalysts.com) or visit the EcoAnalysts website at [www.ecoanalysts.com](http://www.ecoanalysts.com).

#### **About EcoAnalysts, Inc.**

Founded in 1992 in Moscow, Idaho, EcoAnalysts is the nation's recognized leader in the field of aquatic monitoring and ecological consulting services. EcoAnalysts is committed to helping our clients make highly informed decisions regarding the condition and stewardship of natural resources. With its experienced field technicians, taxonomists, and senior consulting scientists, the company is able to provide clients with superior biological monitoring services at reasonable costs. EcoAnalysts has offices in Idaho, Missouri, Florida, Pennsylvania, Massachusetts and Vancouver B.C. EcoAnalysts operates the largest bioassessment laboratory in North America, processing more than 7,000 samples annually, and has completed projects throughout North America, as well as in Suriname, Peru, Brazil, Mexico, Australia and India. EcoAnalysts serves a wide variety of clients, including tribes, watershed councils, universities, private corporations,

and federal, state, and municipal government agencies. For more information, visit [www.ecoanalysts.com](http://www.ecoanalysts.com).
